Dividends

A fully franked final dividend of 2.5 cents per share and a fully franked special dividend of 1.5 cents per share in respect of the year ended 30 June 2019 were both paid on 11 October 2019.

Since the end of the half-year, the Company has declared a fully franked interim dividend of 2.5 cents per share to be paid on 23 April 2020. The record date for entitlement of the interim dividend is 18 March 2020 and the ex-dividend date is 17 March 2020.

Dividend Reinvestment Plan

The Company’s Dividend Reinvestment Plan (“DRP”) will operate in relation to the interim dividend. The DRP has been structured to take account of the relationship between the market price of the Company’s shares and the Company’s net tangible asset value (“NTA”) per share at the relevant time when dividends are being invested.

If the prevailing share price is greater than or equal to NTA per share, DRP Participants will be issued new shares. If the prevailing share price is less than the NTA per share, dividends subject to the DRP may be used to cause the acquisition of the Company’s shares on-market and if additional shares are required to satisfy DRP Participants, issue new shares. The last day for the receipt of an election notice for participation in the DRP is 25 March 2020.

Interim Results Commentary

Company Performance

The Company's portfolio produced a return of 20.06% for the six month's ended 31 December 2020.

Portfolio Returns per annum	
1 Year	14.94%
2 Years	8.43%
3 Years	12.22%
Since Inception*	5.65%

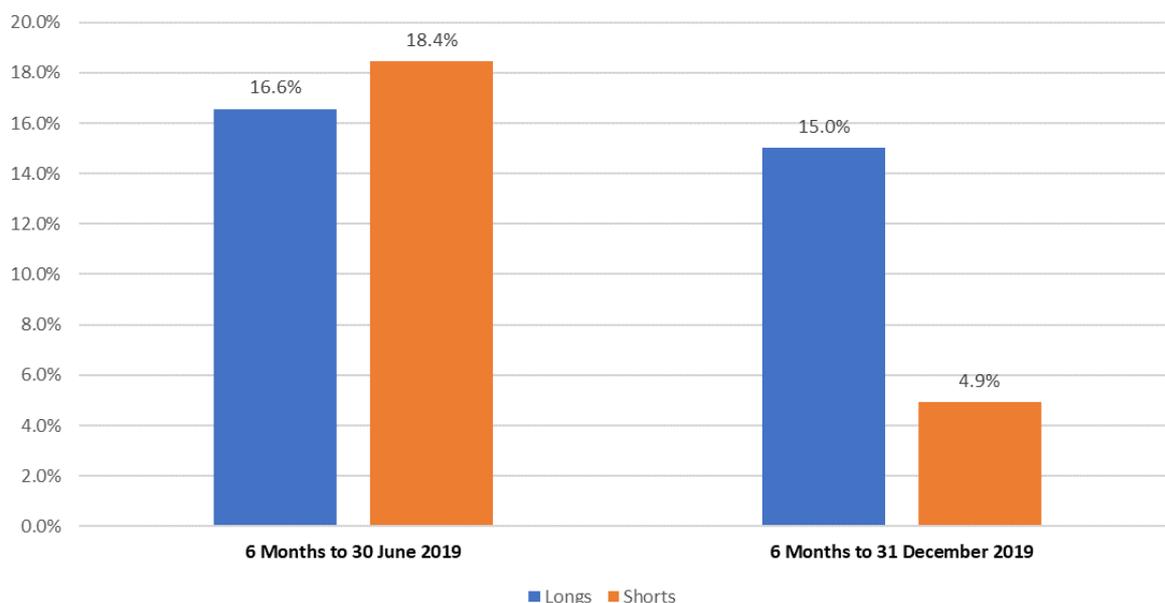

* Net Tangible Assets performance since listing (at \$1.065 after listing-related expenses in December 2015). Includes the hypothetical re-investment of Dividends.

Total shareholder return, as measured by share price movement and dividends paid over the six months to December 2019, was +29.96%. The Portfolio was managed within defined parameters with net exposure (long positions offset by short positions) averaging 0.91%, gearing averaging 4.58 and the number of pairs averaging 30. There was no change to the investment team, and no change in responsibilities within the team.

Fundamental Performance of Companies in the Portfolio

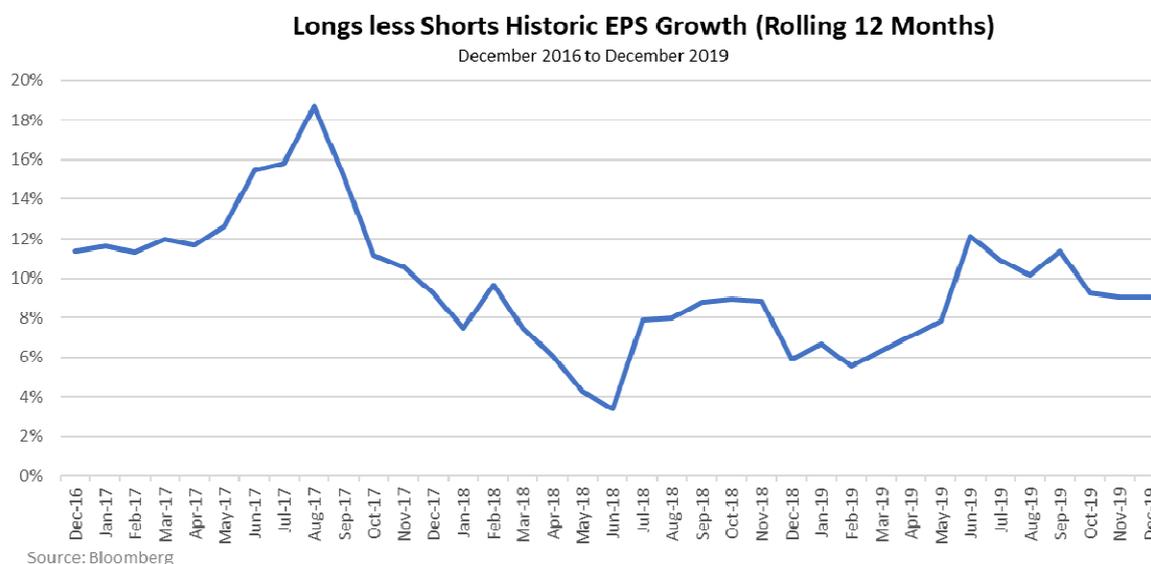

As the Portfolio carries close to zero net exposure to the equity market (our long and short portfolios are almost equal in size), the direction of the market has little influence on returns. This is demonstrated by the lack of correlation of returns with the share market and other asset classes. The driver of our returns comes entirely from the relative performance of the long versus short companies in each of our pair positions. Over calendar year 2019, we experienced a favourable balance of positive company results and announcements for our long portfolio, and negative for our short portfolio yet it was a tale of two halves in terms of portfolio returns. For the 6 months to 30 June 2019 the portfolio return was -4.27% with the subsequent 6 months to 31 December 2019 returning 20.06%. The performance of the long and short portfolios for the two halves of the calendar year is shown in the chart below. Throughout the year the long portfolio financial results progressively improved relative to the short portfolio, and this positive fundamental performance drove progressively improving portfolio returns.

Long/Short Portfolio Returns - 2019CY

Interim Results Commentary (continued)

Below we show the difference between the historic earnings growth of the long and short portfolios. We assess a broad range of issues when assessing companies and predicting next year's EPS is not high on our list of priorities. However, its delivery indicates when you are on the right track. Given the way we construct our portfolio, a difference between the two portfolios of 5-10% is significant. It is also evident that this gap increased through 2019, reflecting improving fundamental financial results.

On Market Buy-back

On 17 June 2019, the Company announced it intended to undertake an on-market share buy-back of up to 10% of the Company's issued share capital or approximately 10.2 million ordinary shares within the next 12 months.

The Company appointed Morgans Financial Limited to act on behalf of the Company in relation to the share buy-back process and the buy-back commenced on 1 July 2019.

Since 1 July 2019, a total of 5,389,256 shares have been bought back. The share buy-back programme remains in place and the Company will keep the market informed of the buy-back's progress in accordance with the ASX Listing Rules.

This report is based on the half-year interim report which has been subject to an independent review by the Auditors, Pitcher Partners. All the documents comprise the information required by Listing Rule 4.2A.

The interim financial statements have been prepared on an accrual basis and are based on historical costs modified by the revaluation of selected non-current assets, financial assets and financial liabilities for which the fair value basis of accounting has been applied.

* As the share price for the Company was less than the Company's NTA at the time of the final dividend payment on 11 October 2019, cash available for distribution as dividends on shares subject to the dividend reinvestment plan was used to acquire the Company's shares on-market and therefore no new shares were issued.

(c) Share Buy-Back

On 17 June 2019, the Company announced it intended to undertake an on-market share buy-back of up to 10% of the Company's issued share capital or approximately 10.2 million ordinary shares within the next 12 months. The share buy-back commenced on 1 July 2019 and during the period ended 31 December 2019, 3,966,969 shares have been bought-back. The shares bought-back were subsequently cancelled.

(d) Dividend Reinvestment Plan

Under the terms of the DRP, 244,568 and 120,232 ordinary shares were acquired on-market for DRP participants at \$1.189 and \$1.007 per share respectively. These shares were applied to the holdings of the DRP participants as at the dividend payment dates of 19 October 2018 and 23 April 2019.

The DRP has been structured to take account of the relationship between the market price of the Company's shares and the Company's NTA per Share at the relevant time when dividends are being invested.

If the prevailing share price is greater than or equal to NTA per share, DRP participants will be issued new shares. If the prevailing share price is less than the NTA per share, dividends subject to the Plan may be used to cause the acquisition of the Company's shares on-market and if additional shares are required to satisfy DRP Participants, issue new shares.

Our responsibility is to express a conclusion on the half-year financial report based on our review.
